

Contact-Free Claims Keep Drivers Safe and Productive

DON'T LEAVE DRIVERS WAITING INDEFINITELY

Social Distancing is a priority during this time to prevent the spread of COVID-19. CEI uses photo-based estimating, alongside a fully dedicated support team, to complete repair estimates remotely based on photos from mobile phones.

Contact-free repair and rental facility protocols, along with deep cleaning services, ensure an added layer of safety.

DRIVERS CAN NOW:

Avoid contact at the repair shop obtaining an estimate

Submit damage photos from their phone

Get repairs completed with less downtime

Help maintain the safety of themselves and others

Fleets that use photo-based estimating have seen an average cost savings of \$150-\$200 per claim and an average reduction of two days of repair cycle time!

See how Contact-Free Claims works >>

How It Works

The Contact-Free Repair Process allows fleets to minimize unnecessary interactions along the repair cycle so drivers can get back on the road quickly and safely.

Your drivers can use our photo-driven claims tool to snap photos of vehicle damage immediately after a collision. Photos are then reviewed by our certified appraisers who use advanced tools to prepare the estimate remotely with proven reliability. Drivers won't need to go into shops for a live estimate, and the repairs can begin sooner.

Once photo-based estimates are complete, drivers can drop off their vehicle without having to enter the repair facility. They can then pick their vehicles up with the keys left on the hood for them, all to minimize unnecessary interaction.

Snap photos of the damage

Auto upload photo to ClaimsLink

Get fast approval via advanced estimatics

Limit contact with the repair facility

Receive real-time updates

Keep your drivers moving!
