

# Your drivers face more hazards on the road than ever

## DRIVERCARE™ HAZARD AWARENESS TRAINING KEEPS THEM SAFE

CEI's DriverCare Hazard Awareness training module makes your drivers better by helping them to identify and avoid road hazards. Using advanced, interactive live-action video, Hazard Awareness places drivers in a number of real-world scenarios with scoring based on reaction time.

Hazard Awareness is just one of many driver training modules to help test driver competencies, identify risky drivers, improve their skills, and change their behavior. The training modules are key part of DriverCare, the industry's leading integrated driver risk management program.

### VALUE

Short, online training modules keep drivers' attention, effectively reinforcing safe driving habits

Customers see their lowest incident rate in the year they assign the most training

Comprehensive training for improved hazard recognition

Engages drivers with interactive controls that mimic daily driving scenarios

Requires re-testing until a driver successfully identifies 100% of the hazards to ensure comprehension

See how this module works and its benefits >>

# How It Works

A tutorial and practice scenario are provided to ensure users understand and become familiar with the user interface and controls, before the scored scenarios begin. There are seven scored scenarios that will test users' ability to recognize common driving hazards. The sooner the hazards are identified, the higher the score. A recap is provided after each scenario which will teach defensive driving best practices.

# Hazard Awareness Training Benefits

## FOR DRIVERS

Highlights common hazards that all drivers face, such as pedestrians, bicyclists, aggressive motorists, disabled vehicles, wildlife and cars in your blind spot

Recommends proven defensive driving skills such as active scanning and looking further down the road to spot hazards sooner

Increases overall awareness of the need for defensive driving

## FOR COMPANIES

Identifies inexperienced and high-risk drivers through test results

Provides an effective means of remediation

Reduces the risk of corporate liability in case of a crash

Supports company employee safety initiatives
